

OVERVIEW

Verkada Cloud Backup

In addition to storing footage directly on each camera, we provide the option to backup all your camera footage securely to the cloud.

Backup Included

Included with your Verkada camera license is 30 days of continuous cloud backup. Backup can be enabled on a camera-by-camera basis. If you need longer than 30 days, we provide additional 30-day blocks.

Schedule Your Way

To avoid impacting your organization's bandwidth during peak hours, you can set your cloud backup upload to happen during off-hours, as well as in standard or high definition.

Effortless to Manage

Just like the footage onboard your camera, there is no need to manage your cloud storage. All storage is available over a rolling 30 days, and important footage can be archived for as long as you need.
