WHY ORGANIZATIONS CHOOSE VERKADA

Strengthen physical security with Verkada's cloud-based surveillance solution. By combining the flexibility of the cloud with the reliability of built-in storage, Verkada's all-in-one cameras simplify surveillance management and deliver proactive alerts and insights for your institution.

Always Reliable, Always On
View footage from anywhere with 24/7 continuous coverage & offline access

Simple To Use
There is no training required — simply login from your preferred device and start monitoring or investigating

High Resolution Video Quality
Cameras can be streamed in HD while all motion-triggered events are stored and recorded at the highest resolution

No Ongoing Maintenance Costs
Without NVRs and DVRs, and an industry-leading 10-year warranty, there are no additional costs

Reduce Investigation Time
Advanced edge-based analytics filters footage based on what is in frame, including people and vehicles

Built For Low Bandwidth
At just 5-20 Kbps per camera, Verkada operates over low bandwidths while providing minimal data consumption

Stays Safe & Secure
Verkada cameras update automatically so there is no need for added steps or downloads to ensure cybersecurity

Budget-Friendly Solutions
We work closely with organizations to help you find grants or discounts to help you meet budget

SOLUTION FOR RELIGIOUS ORGANIZATIONS

VERKADA HYBRID CLOUD ARCHITECTURE

NO NVRs or DVRs
Industrial-grade solid state storage saves up to 120 days of continuous video

EASY TO SCALE
Bandwidth friendly and supports thousands of cameras across unlimited locations

CENTRALIZED MANAGEMENT
Modern platform enables secure access on any device from anywhere in the world

Reliability of Solid-State Storage with Cloud Accessibility

SIMPLE TO INSTALL
- No NVRs, DVRs, or servers—just a PoE connection
- Cameras come online and are configured in minutes
- No added software or complexities like port forwards

EASY TO USE
- Centralized management for access anywhere
- No training required to access footage and features
- Find, download, and share footage from any device

BUILT FOR SCALE
- Bandwidth-friendly, using 5-20 Kbps per camera
- Scale to thousands of cameras across all locations
- No added equipment to support additional cameras

NO ADDED COSTS
- Hardware includes industry-leading 10-year warranty
- Automatic firmware updates keep systems secure
- No added costs for new features and enhancements

ADVANTAGES OF VERKADA'S CLOUD-MANAGED SOLUTION
- Secure remote access on any device anywhere
- See health and receive alerts if cameras fall offline
- Visualize your space with people counting & heatmaps
- Find individuals based on attributes and face matching
- Instantly share live footage via SMS and email
- Live, proactive alerting based on unusual activity
- Integrates with active directory solutions
- Continuous updates with new AI features

SOLUTION FOR RELIGIOUS ORGANIZATIONS

BENEFITS ACROSS THE ENTIRE ORGANIZATION

Religious organizations of all sizes choose Verkada to simplify and strengthen their physical security operations. Choosing Verkada means no longer having to maintain outdated equipment like NVRs and DVRs, parsing through hours of unnecessary footage, or jumping through hoops to get access to cameras in emergency situations. With Verkada, footage is always accessible, analyzed, and safely stored on camera as well as in the cloud.

Verkada for Administration Teams

- Simple to install without adding infrastructure like NVRs and DVRs
- Low bandwidth approach protects against impact to other local area devices
- Firmware updates happen automatically, keeping cameras up-to-date and protected
- Know what is happening around the building in real-time

Verkada for Loss Prevention and Security Teams

- Quickly view any camera from any site with a computer, mobile device, or Apple TV
- Easily manage user roles and permissions so nobody has access to restricted areas
- Receive instant alerts for any meaningful motion, including events that happen after hours
- Share live links to cameras with first responders so they can view and act on emergency situations
- Download and export footage with anyone in a simple MP4 format

Verkada for Leadership and Management

- Onboard storage provides reliability that video footage is never lost
- Access cameras from any device without having to be on-site
- Protect your investment with an industry-leading 10-year warranty

SOLUTION FOR RELIGIOUS ORGANIZATIONS

CUSTOMER STORY: SALVATION ARMY

2x	27%	10 Year
Faster Install	Lower CAPEX	Product Warranty

"The reason we chose Verkada was because of how easy it is to use. You don't have to be an IT Guru to understand how it works."

- Isaac Samuel, IT Manager, Salvation Army

The Salvation Army is an international non-profit organization with 7,546 centers across the United States. Their mission is to build local programs designed to offer immediate relief, short-term care, and long-term growth in the areas that will best benefit the community.

To ensure the safety of The Salvation Army facilities in the Houston Area, Isaac Samuel, IT Manager, shares his experience evaluating, implementing and managing a new video security system.

Simple to Install & Use

- With an expansion from four to 19 facilities, scaling video security was a priority, and Verkada's plug-and-play solution with 5-minute installs made it a manageable task

Proactive Alerts

- Verkada's management platform allows Isaac and his team to check-in and understand events as they're happening on-site from any location at any time

Low Bandwidth Consumption

- While the previous system caused the network's bandwidth to slow down, deploying Verkada ensured coverage without eating into network data
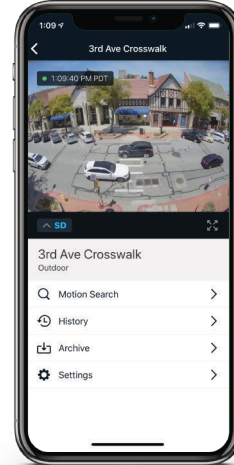

Easily Share Footage

- With simple downloading and sharing of footage, Isaac is able to quickly download clips to share with local authorities, as well as insurance companies for claims.

FEATURES & EXPERIENCE

REAL-TIME VISIBILITY & RESPONSE

- Instantly share live video streams with first responders, security, and facility managers via SMS and weblinks

- View and manage video on any device

- On-camera accelerometer sends SMS alerts when tampering is detected

'ZERO CONFIGURATION' SETUP

- No NVRs/DVRs, VPNs, or port forwarding

- All cameras are PoE and, by default, communicate over HTTPS via port 443

- Cameras auto-provision into your account once plugged into a PoE switch with DHCP

EASY MANAGEMENT

- Easily control user permissions at the global, region, office, and camera levels

- SAML and two-factor authentication available for added account protection

- No thick clients, third-party plugins or additional hardware required
